

CARBIDE BURRS

CARBIDE BURR INOX

Carbide burr INOX has a special cut for stainless steel (INOX). The INOX cut provides an extremely high efficiency on stainless and acid-resistant steel. It produces significantly less vibration than conventional rotary cutters and low heat generation reduces the risk of bluing on the material.

CARBIDE BURR INOX SHAPES

SHAPE A

Cylinder without Endcut

SHAPE C

Ball Nosed Cylinder

SHAPE D

Ball

SHAPE E

Oval

SHAPE G

Pointed Tree
